ESTABLISHED 1827.

EDWARD SMITH & CO.'S,

MANGANIC

Liquid Dryer,

For all kinds of paint ground in Raw Linseed Oil, this is a

PERFECT DRYER.

DIRECTIONS.

Use Raw Linseed Oil in the Paint in which you use this DRYER; one part LIQUID DRYER to 12 to 16 parts Raw Linseed Oil mixing the DRYER and Oil together first when convenient. Should the Paint, already mixed, work stiff or pull under the brush, add a little of the LIQUID DRYER, which will remedy the trouble

The name of our Liquid Dryer indicates its origin, and we claim for it over all other Dryers of every name or kind, the following merits.

It will mix perfectly with raw linseed oil in any proportion.
It will keep any length of time always ready for use.
It will dry the paint from the bottom to surface.
It will make the paint flow perfectly.
It will dry the paint with a gloss.
It will not change the nature of raw linseed oil.
It will not change or injure any known pigment or color.
It will not discolor zinc, white lead or the most delicate tints.
It will not set the paint on the surface so that the painter cannot finish his work without showing brush laps.
It will not curdle, precipitate or gum up.
It will not make a boiled oil, but it will make raw oil do all that is claimed for boiled oil without changing the nature of the raw oil.

OIL MARKET.

NEW YORK, Tuesday Ev'g, March, 13.

Linseed oil has been in increased demand yesterday and to-day, and at the close the market is stronger than for some time past with continued shipments to the West. There was some disposition to sell last week, and we heard of parcels being placed for prompt delivery at 62c, also 5000 gallons at 61c, and in Boston 5000 gallons Boston make and 100 bbls Western, from store, at 60c, though these figures were refused for further lots there, and we hear that 62c was bid here to-day and refused. The price from crushers to-day is 63@64c and some ask even 65c in casks.

Mustard and rape oils are quiet and unchanged.

Nothing to report in whale oils other than in our Eastern letter.

Lard oil is again lower and prime city is reported to have sold in a round way at 75c. The price however for jobbing parcels from manufacturers ranges from 77½@82½ for prime city make. The sales reported are 50 bbls Chicago make last week at 80c, 50 bbls Baltimore last week at 80c; 150 bbls city at 80@82½c, and at the close 200 bbls city at 75c, closing more steady with dealers inclined to lay in stocks and we heard that 75c was quite freely bid. The low grades are quiet and a little lower also, sales 75 bbls at 60c for good No. 2; 67½c for No. 1, and 72c for extra do.

Crude cotton seed oil has ruled dull the past week though the supply is not large. In the present state of the market a small quantity supplies the market and buyers hold off for lower prices. Of the parcels on dock last week two were stored, no bids of better than 44c having been obtained, but after they had gone into store buyers raised their views and we heard that 46c cash had been offered, and even 47c thirty days, which the holders refused. We hear of three parcels on the way, in all about 250 bbls, but as receivers say these are are about the last they will receive, they are not inclined to offer them at any concession.

Summer yellow oil has come to hand more freely the past week but had been sold previously, except a small lot of 29 bbls which were offered from dock and brought 49½c. Our dealers have been reselling at 51@52½c, and 200 bbls sold on spot, and 50 bbls to arrive within this range. We hear that 50c was bid at the close for a parcel of 100 bbls.

Winter yellow has not been changed in price by manufacturers, but there are outside sellers offering at 56½c, and sales of 100 bbls at 56@56½c. White can be had at a fraction from the price of manufacturers.

Summer white is in some demand, but lots to arrive would hardly bring better than 56c.

Menhaden oil is dull and offering more freely with buyers holding off and bidding 39c. Most sellers are firm, however, and one of the largest holders asks 45c for Maine catch. The price is unsettled and nominal, and may advance or decline in the near future. The only transaction we hear of is 125 bbls Maine at 41c. Pressed oil is offering low from Boston, but a special lot which can be had at 41c laid down here is said to be off quality.

Domestic cod oil is offering at 52c.

Olive oils are easy; 1,000 gallons were placed on private terms; the price is about $1 20.

Palm is steady but quiet.

Cocoanut is unchanged.

Red oil is slow of sale, and can be had at 50c for saponified; though 51c is generally demanded and even 52½c for small parcels.

Paraffine oils are steady but unchanged in price; car load lots selling at 31c.

Tallow oil is easy; 200 bbls single Western sold on private terms; 25 bbls at 62@63c. City double sold at 77½c for best, and 70@72c for No. 1.

West Virginia oils are offering freely and the demand is fair for moderately cheap grades. Sales are 400 bbls good reduced 29 gravity at 21@22c.

OIL CAKE.

The market for Western bag has been entirely nominal and $35 was about the nearest value quoted. At the close we heard there had been a sale of 100 tons, but the terms were not given, probably at not far from the the above price. We have not heard of anything doing in city or cotton cake.

SEEDS.

The market for Calcutta linseed is nominal. There have been no recent sales and prices remain in the same position as the past two weeks. The price is off in Calcutta and freights easy, but this would not cheapen seed for the next five months.

New Bedford Oil Market.

NEW BEDFORD, March 12, '77.

The crude sperm oil market has been very dull the past week and the only sale we have note is of 100 bbls for manufacture on private terms, but reported at $1 33c.

The crude whale oil market has also been very dull the past week, and we are without a single sale to report. Prices nominal. 67@70 for southern, and 73@75 for Northern.

LARD.

The market has continued in an irregular state and prices are no higher, but rather tend downward. Opening on Tuesday at a shade better than 10c, parcels have dragged, and at the close, under unfavorable advices from the West, holders are now willing sellers at 9⅝c. City is also weak and held at 9⅝, with 9½c bid. Stearine is slow, and prime Western is held at 10@10⅛c.

:o:

TALLOW.

Tallow has been in jobbing request and prices are about steady, holders quoting 7⅞@8c, with parcels being taken quite freely at these figures. A few outside parcels are to be had at less.

:o:

PETROLEUM.

There is a slow demand at the moment, but trade has been more active and considerable quantities have been taken and 16½c paid, but at the close prices are again easier, and refined is now offering at 15½c. Crude in bulk is held at 10½c and in shipping order at 13¼c. Cases selling steadily at 20½@21c. Naphtha dull at 10½@12c.

:o:

NAVAL STORES.

The market has been rather more active during the past week and prices are ruling firm in tone. Spirits of turpentine opened on Tuesday at 40c but has advanced, and at the close holders are asking 42c. Rosins are a shade firmer, and strained is now quoted at $2 05@2 15 for common to good. Tar is in small request at $2@2 37½. Pitch dull at $2 25@2 50.

A seedy fellow went into a Dunkirk restaurant a few days since and called for a good supper. The restaurant keeper gave the fellow a look that seemed to say, can you pay for it? The seedy chap said:—"Would you like your pay in advance?" "I wouldn't object," said the proprietor. "Well, I guess I can pay you," and produced a hundred dollar bill to get the fifty cents out of. The proprietor said, "Have you nothing smaller than this?" "Yes," and he drew forth a fifty dollar bill. The proprietor was more confused and said, "Have you something smaller than this?" "Yes," and he launched out a twenty dollar bill. "Is this the smallest you have?" "No," and he handed up a ten dollar bill. The proprietor got his fifty cents, and the man got his supper; they were both satisfied. The man was from oildom; he was covered with oil and money.

FOR SALE.

Four clear PINE ROUND TANKS.—Capacity, 5,000 gallons each. Three of 1,000 gallons each. Several smaller Tanks, and a lot of wood tubs. One heavy cast iron kettle—1,000 gallons; and one 500 gallons capacity, for boiling Oil; and a lot of miscellaneous Machinery.

PAINT MARKET.

NEW YORK, Tuesday Eve. Mar. 13.

The market for paints has been very active during the past week, and the demand is increasing. We don't hear of any special items of interest except that there are parties offering English ready mixed paints, and that orange mineral, owing to a recent decision of the Secretary of the Treasury, is admitted at 25 per cent as a painter's color.

The exports since January 1 are as follows:

	Pkgs.	Values
Oxide of Zinc	805	$11662
White Lead	144	1702
Red Lead	10	70
Ultramarine	5	305
Vermilion	....	....
Paints not spec	991	15068
Varnish	539	7807

The following will show the total imports of paints for the week ending March 12.

Bronze powder 15 cs; chalk 10 cks; do. 400 tons; china clay 600 cks; chrome yellow 6 pkgs; cliff stone 225 tons; Dutch metal 3 cs; flocks 25 pkgs; glue 5 cks; iron oxide 20 pkgs; ivory black 20 pkgs; lamp black 4 pkgs; manganese 30 bbls; patent paint 13 cks; plumbago 298 bbls; pumice stone 80 cks; talc 459 pkgs; varnish 1 cs; venetian red 405 bbls; verdigris 5 cks; vermilion 1 ck; white lead 861 pkgs; zinc oxide 150 bbls; quicksilver 100 flasks.

White lead is firm for city at 10¼c less discount. Dry is generally held at 8½c but there are sellers from second hands at 8⅛c and some parcels are said to have been offered at even less. A lot of about 30 tons New Britain quick process is still offering on the market but can find no buyers.

English lead in full supply but selling well; we note sales from store of 25 tons B. B. at 10⅜@10½c gold; 10 tons to arrive at 10¼c gold; 5 tons Johnson's assorted packages at 10c gold. A parcel of 12 tons Storer brand is on the market but we have not heard the price at which it is held.

American zinc is in steady demand and in fair supply. Lehigh selling at 5½@6½ for ordinary and selected.

French zinc is rather quiet with some parties inclined to shade prices. Sales of 100 bbls V M at 8¼@8½c gold; 50 bbls L Z O at 8⅛@8¼c gold.

Chalk is in fair supply, and as some of our largest buyers are stocked up the market is a little easy, and $1 10@$1 20 would be outside figures.

Whiting is rather quiet. Sales of 100 bbls common at 45c; 75 bbls kiln dried and bolted at 85c.

Paris white in small stock and wanted, with small sales of Queensgate at $1 75@1 80 gold; 5 tons C. T. R. cliffstone at $1 70 curren

China clay has not been plenty on spot and there have been considerable sales to arrive at $17 50@18 50 gold.

Terra alba has sold to the extent of 125 casks at 1⅛@1¼c.

Pumice stone has come to hand freely and 100 casks sold at 1½c; a lot has been offering since at something less than this price.

Venetian red is in good supply and offering freely at 1¾c and less; 100 bbls Cookson's sold in lots at 1¾c.

American quicksilver vermilion has been in only moderate demand, but is more inquired for at the close, with sales of 1000 lbs in bags at 65c gold; 5 cases imitation Chinese at 78½c gold. Imported Chinese still held at 85c gold; English B B is held at 90c gold; Trieste 80c gold.

Carmine has been in more demand of late, and we note one sale of 50 lbs at $6 gold.

Paris green is rather quiet at the present, but the manufacturers are running on contracts previously made; price still 24c.

Barytes in moderate demand with a lot of 50 tons carbonated 97 per cent sold at $30@32 50 gold. Domestic can be had at $30@33 for No. 2 and No. 1 at $30.

Manganese is in light demand with a good supply at from 2½@3½c for ground.

Ultramarine has been selling freely of late both foreign and domestic and prices are firm.

Orange mineral is in demand and 42 casks French are reported sold at 12¾c; German can be had at 10½c gold; 5 casks English F. B. & W. sold at 10⅜c gold.

Umber is generally dull. A lot came to hand that was damaged and sold at auction at 53c; we note a sale of 60 bbls powdered Turkey at 4½c

—The two glass works at Bellevernon, the one at Fayette City, and the one at Brownsville, are in operation.

SPECIAL NOTICES.

CHEMICAL MARKET.

NEW YORK, Tuesday Ev'g, March 13.

While there may be more inquiry we cannot report any improvement in the demand. The tendency of prices is generally to lower rates. The Liverpool market is reported quiet and easy. A feature in the market is the increase in the business done by our merchants on through bills of lading to the West. In this way low freight is obtained, but it may result in considerable annoyance as well as loss, for it would be difficult to place any damage occurring between the first point of shipment and the destination.

Soda ash is dull for carbonated 48 per cent, and sales have been made of 100 tons at 1 90@1 92½ gold for best brands. The sales of high test are 75 tons at 1⅞@1 90 gold.

Caustic ash is also very quiet, and the best brands, such as Tennant's and Johnson's, can be had at 1 95@2⅛ gold, the latter price for small parcels. There have been sales of 150 tons, including Sullivan's at 2c gold.

Caustic soda has not been in large supply on spot, several lots which came to hand going on old contracts. There were sales of 250 drums mostly Liver and Widnes at 4¼c@4 27½ gold for 70 per cent, and 4½c gold for 60 per cent, and 75 drums 60 per cent to arrive at 4 45 gold. At the close there are sellers to arrive at 4 45 gold and 4 40 gold bid. The sales of 76 per cent are fair at 4⅞c gold.

Sal soda has not been very plenty on dock, and sales were made of 20 tons Newcastle at 1 30 gold, also some parcels of Liverpool at 1 30 gold. To arrive sales are making at 1 27½ gold.

Bleach is dull and offering at the close at 1 60c gold for good, full test hardwood, Liverpool brands. There was a lot of high test Pilkington's on the market and 1¾c currency was bid for this, and a part of the lot was placed at 1 17½c which was the lowest the holders would take. The sales reported on spot are 200 casks at 1⅝c gold and 1 70@1 80c currency.

Brimstone is in full supply and slow of sale. A cargo at hand is said to have been offered at $28 50 gold, but this price was also bid for a part, and 100 tons sold at $29 gold; we also heard of 40 tons in Baltimore at $28 50 gold.

Nitrate of soda is firm, as most of the recent arrivals were taken from the market. We do not hear of any lots offering at the close at less than 1 92½c gold, and most holders are firm at 1 95c gold, at which 200 bags sold.

Saltpetre was sold last week to the extent of 1200 bags in bond at 4c gold. Holders were previously asking 6c gold.

Chlorate of potash is in good supply but mostly held by our party. Best can be had at 20½c gold with sales of 5 keg lots at 21c gold.

Oxalic is easier in price and can be had at 10⅝c gold, with single casks to be had at 10¾c gold. In Boston 10 casks sold at 10½c gold.

Arsenic is dull for the moment, and Garland's is jobbing at 3½c gold, a lot of 10 kegs sold at this price.

Cream tartar is held by some of the manufacturers at 29½c gold for five casks, and 30c gold for single casks, but others are offering at 29c gold. We hear that 28¾c gold was refused for 10 casks by one of the largest makers.

Argols have been in fair demand, with a good grade for making cream, selling at 22c gold. We note sales of 5,000 lbs crude on spot, and 25,000 lbs refined to arrive on private terms. The lot of 240 casks Oporto at hand were mostly sold previously.

Acetate of lime is in good supply and low in price, with little demand.

Carbonate ammonia has been selling freely and rules firm in price; 40 casks sold at 14c gold.

Sal ammonia is selling fairly; 15 casks brought 10 35c gold.

Blue vitriol is in demand and the supply is light; sales 10,000 lbs ordinary at 8¼c.

Nitrate of lead selling freely at 10¼c gold for best American.

Sugar of lead is unchanged.

SPECIAL NOTICES.

Blue Vitriol.

PATENT RIGHT
FOR SALE.
The patent right for the United States of a new and improved process in the manufacture of Cream Tartar.
This process has eminent advantages over all others now known. The production is greater, the crystals larger, finer and chemically pure. The manufacture vastly simplified, and the cost of production being about (50 p. c.) fifty per centum less than by any other method or ordinary process.
For particulars apply to or address,

POISONOUS ANILINE DYES.

Before Commissioner Winslow on Saturday, John Halliday, the proprietor of the aniline colors and dye manufactory in Williamsburg, was charged with illicit distilling of liquors on his premises. The Deputy Marshals and Collectors testified Saturday that on Feb. 21 they found a tub of molasses mash of a capacity of about 1,000 gallons. With this still they made a quantity of rum, of an unnatural color, caused by a red substance with which the inside of the still was coated. Gen. Catlin asked for the discharge of the prisoner on the plea that he was pursuing his legitimate business of chemist. He offered to prove that the color in the rum was caused by poisonous dyes, and contained enough arsenic to make it fatal to one drinking it. The Commissioner refused to dismiss the complaint, and further testimony will be heard.

A SALERATUS FACTORY DESTROYED.

A fire broke out about 1:30 a. m. sunday, in the engine-room of J. M. Taylor's saleratus factory in Brooklyn, resulting in the destruction of the building and contents, with a loss of about $140,000. The building was a six-story brick structure, and the fire burned with great rapidity, and within half an hour the interior, and roof were burned out, the walls falling with a crash.

ON NITRALIZARINE.

M. Rosenstichl says: "I have had the honor of recently communicating to the Academy a note on nitralizarine, in which I gave the history of its discovery, its mode of formation, which is very remarkable and its properties as a dye-drug. At present it is found in the market, and is offered for sale by several makers of artificial alizarine in Germany, who have taken advantage of the publications of the Industrial Society of Mulhouse on the subject. In this note I spoke of nitralizarine as a new substance. This statement requires to be rectified. Mr. H. W. Perkin, on treating diacetylyzarine with nitric acid, obtained a nitric derivation of alizarine which has the property of dyeing an orange with aluminous mordants, and a reddish purple with those of iron. According to these characters, it may well be identical with the compound which I described, and which is obtained by the direct action of hyponitrous acid upon dry alizarine.

Although Mr. Perkin's method of preparation is not of a nature suited for industrial purposes, and has had no influence in this direction, the priority of the discovery belongs incontestably to him.

Peter Schneider, proprietor of a glass works in Brooklyn, stepped on to a Flushing ave. car on Saturday morning having in his pocket $1,500. As he was alighting from the car at Classon ave., a well-dressed young man brushed past him, then turned and went back into the car, saying he had made a mistake. A moment after Mr. Schneider discovered that his money was gone, and suspecting the young man, he informed the conductor of his loss. When he left the car Mr. Schneider followed him along Spencer street to a house in Park ave. He inquired for the suspected thief at the house, but the intimates pretended to know nothing of him, and Mr. Schneider could only submit his case to the police.

—The Omro (Wis.) glass factory experiment bids fair to be a fine success. The factory employs 30 men and has one furnace, at which four blowers work. From 1,000 to 1,200 boxes of window glass, each containing 50 feet, are turned out monthly, and sell readily for $7 per box. The present capacity of the work is inadequate to supply the demand for glass, and a new furnace is to be erected at once, and the works enlarged.

—The outlook is regarded as being more favorable for western window glass manufacturers, and an increased trade this spring is expected.

DYES.

NEW YORK, Tues. Ev'g, Mar. 13.

The market for dyes and dye stuffs has not materially changed during the past week. Trade is quiet and consumers are not buying in large lots. The indications are nevertheless favorable, and time will make a marked improvement in this line. Manufacturers and mills are making ready in anticipation of a good spring trade.

Gambier is in more active demand, holders are asking 5c gold, but round lots may be bought at a less figure. We hear of sales of 200 bales on spot at 4⅞c gold. Also 400 bales from dock at same figure.

Indigo has not been active the past week, though prices are firmly held at our last quotations. We hear of no large transactions. Small jobbing lots have been the rule. We note sales of 15 ceroons Guatemalas 6's at $1@1 05 gold; and lately 20 cers 7's at $1 10 gold cash. Bengals are quoted at $1 25@1 50c gold. Madras 70@80c currency. Guatemala at $1 00@1 25c gold. Manilla 65@70c currency.

Cutch is firmer. The demand is steady for small lots, and holders are asking 7¼c@7½c gold for jobbing lots, and 10 bale lots are being taken at 7¾c currency. We note sale of 100 bales at 7⅛c gold, also sale of 700 bales to arrive.

Fustic remains quiet. Holders are asking $22 gold, but $20 would buy a round lot. We hear of no large sales.

Madder finds buyers in small lots for present use, and prices are steady at our last quotations. Dutch is held at 7½@8c currency; C C Diamond A is quoted at 6½c gold for jobbing lots. French is held at 5½c gold.

Cochineal is in limited demand just at present. We hear of no sales. Prices are not changed.

Sumac is not active, holders are asking $112 50@115 for prime. Lower grades are quoted at $105@107 50, and a late arrival is offered at $60@62 50 in round lots from store. We hear of no sales.

Bichrome.—Notwithstanding the reduction in the price of the American last week to 13½c holders of Scotch are asking 14c, and single casks of Scotch have been sold this week at 14⅛c. A much less figure will buy a round lot. It is reported that the market abroad is lower and that it can be laid down here at 13½c. We note one sale of 5 casks Scotch at 13⅞c, another of 5 casks at 13¾c.

Logwood is firmer in price. Dealers are asking $23 gold for Jamaica to arrive, $22 would buy, but purchasers will not offer that figure. Laguna is quoted at $36, Campeachy $30, Jamaica $22 gold, Domingo $23 currency.

Divi Divi is quite inactive. We hear of no sales. Quotations are 65@70 as to quality and quantity.

Garancine is in more active demand, and is selling in small jobbing lots. For small lots the quotations for French is 11c@11⅛c gold.

Turmeric is quiet at last weeks quotations.

Cudbear is selling in small lots at former quotations. Smith's English superfine 19 c gold; Poirrier's No. 1 25c gold. No 2 17@18c gold.

London blue and mordant quiet. L B at 11c; M 25c currency.

Cochineal ammoniacal—a dye which has been out of use in this country for some time has made its re-appearance in our market and is in active demand. It is quoted at $2@2 50 currency as to quantity.

Annatto is in fair demand in a small jobbing way, but prices are a little off. F. is quoted at 30c; L. L. R. at 25c for jobbing lots.

Annatto seed of the new crop is freely arriving, but the demand is quiet and little is doing in the seed. Holders ask 16c currency for round lots, but find no buyers. A much lower figure will probably buy.

Fustic extract. French is quoted at 20c gold in small jobbing lots.

Indigo extract is in more active demand. English is held for jobbing lots at 14@16c gold as to quality and quantity.

Logwood extract is in fair and increasing demand. French prime is quoted at 10c gold, extra at 11c gold for jobbing lots.

Sumac extract is held at 9½c gold for English prime, other grades French and English are quoted at 8½@10c glod. Demand is quiet.

WEEKLY REVIEW.

There is as yet no marked increase in the volume of trade, but it is pretty generally conceded that the inquiry is greater and the prospects are brighter. The exception, perhaps, is in the lubricating, burning and soap makers' oils, most of which seem to be quiet and weak in price. The paint trade is steadily improving and must be considered good. The drug trade keeps up well and our manufacturing chemists are generally running to their full capacity. The demand for dyestuffs is increasing and even the heavy chemicals seem to be in little better demand. There have been no failures of any importance reported for some time past till to-day; we hear that the Union Oil Co., of Chicago, have gone under. The advance of 50 per cent in railroad freights to the West may temporarily check shipments of bulky goods. Imports of drugs, dyes and chemicals continue on a liberal scale.

Our local money market continues very easy, and the general quotations on call loans are 1½@2 per cent.

Prime commercial paper is selling at 4@5 per cent.

Government bonds have been quite strong with advancing prices.

The closing prices bid on Monday were as follows:

NEW INVENTIONS.

(Specifications furnished for 50 cents.)

IMPROVEMENT IN DISINFECTANT DEODORIZER AND FUMIGATOR.

The object of this invention is to produce a cheap and effective article which shall possess at once all the requisite qualities of a disinfectant, a deodorizer, and a fumigator; and the invention consists in certain processes of treating charcoal or equivalent material, and in the improved article produced, as will be hereinafter more fully described, and then pointed out in the claims.

I employ charcoal as a vehicle or carrier for the chemicals used on account of its inflammability and its inherent deodorizing qualities, and because of the facility with which I can saturate it with said chemicals.

To prepare the article, I take about six parts of sulphur, one part of carbolic acid, and one part of iodine, heat them together, and thoroughly mingle them in a suitable vessel. Charcoal is then immersed in the heated solution, absorbing more or less of the chemical mixture, according to its texture or capillary power. This absorption may if desired, be considerably increased by placing the materials in a closed vessel, and exhausting the air therefrom in the manner of impregnating wood with preservative matters, although this operation will seldom be found necessary or of advantage.

The sulphur and the iodine add considerably to the inflammability of the mass, and render it more easy to be consumed when it is desirable to employ it as a fumigator. The union of the iodine and carbolic acid with the sulphur prevents the too rapid condensation of the fumes of the latter, and thus removes the only defect in its properties as a fumigator. The several ingredients, when aggregated, constitute an article which completely answers the specified objects of the invention.

When employed as a disinfectant or a deodorizer it will only be necessary to expose the mass to the air, its qualities being such as to admit the complete evaporation of the deodorizing and disinfecting chemicals. As a fumigator, a quantity of the mass may be easily kindled and burned upon a shovel, or in any suitable manner.

To further improve the article, I propose to roll it in, or dust it with, powdered lime after it has been saturated, as explained. This gives an exterior coating to the mass, which will add the following desirable qualities to the article; It renders it cleanly to the touch, and convenient to be burned in the hand after the manner of a candle or taper; it forms an exterior coating, which will serve, in a measure to retard the too rapid evaporation of contained chemicals; and prevent adherence of the several pieces of saturated coal; it adds to the beneficial qualities of the mass without detracting from either of them.

For convenience in using and shipping I propose to pack the article in convenient quantities in paper or material which will prevent deterioration. Each package may contain a quantity to serve the uses of a small house.

As thus prepared and packed the article will be found useful on board ships, in infected districts, and, in fact, wherever any one or more of its qualities may be desirable. The several ingredients named are deemed the best for the purposes specified: but coke, caked sawdust, or the like might be employed as a carrier, and other disinfectants and deodorizers than iodine and carbolic acid might be mingled with the melted sulphur.

IMPROVEMENT IN LUBRICATING OILS.

This invention consists in a lubricating-oil composed of the ingredients, mixed in the proportions hereinafter stated.

To make the said oil, first dissolve in a quart of hot water the following ingredients, in the proportions named: Sal-soda, one-quarter of a pound; borax, one-half a pound; prussiate of potassa, two and a half ounces; common salt, one-quarter of a pound. Then add to this solution three quarts of castor oil and one ounce of sulphate of zinc. One gallon of my oil is thus produced.

This oil is almost uninflammable, and can be used for a very long time. It is also very cheaply and easily manufactured.

ON THE THEORY OF THE FORMATION OF ANILIN BLACK.

BY M. A. ROSENSTIEHL.

For the industrial production of aniline black in tissues three substances are simultaneously used, viz.: a chlorate, a metallic, and an aniline salt.

Since the origin of the discovery of aniline black, copper has been the metal used to produce the blacks developed in the drying-room, the only ones of which I propose to speak; be the quantity of that metal as small as it may, it is indispensable as long as the chlorates are employed.

The earliest theory offered as an explanation of the particular *role* played by the salts of copper, was founded on the property possessed by copper of forming two series of salts—the cuprous and cupric salts. The salt employed is usually at its maximum degree of oxidation, and, in contact with the aniline salt, is reduced, yielding its oxygen to the aniline, transforming the latter into black. The reduced salt of copper is reoxidized at the expense of the chlorate, and is thus placed in a condition to pursue the same cycle of transformations as long as there is aniline to oxidize or chlorate to reduce.

Ten years ago I showed that this theory is not verified by its results, and that the salt of copper, at a high degree of oxidation, does not act upon the aniline salt at the temperature of the drying-room, but that it influences the chlorate and favors its decomposition.

This remarkable property of the salts of copper is due to the great instability of the chlorate of that metal. Though I furnished abundant proof then, which has not been refuted, the old theory still continues to be admitted.

It was this state of things that led me to make new researches, to develop

their results, and show that these are verified in all their details, producing a theory of the formation of aniline black of the greatest simplicity.

If, as I have already stated, the formation of aniline black depends upon the instability of the chlorate of copper then the products resulting from the decomposition of the chlorate must possess the property of transforming the aniline into black.

The products of decomposition are the lower oxides of chlorine, and being gaseous, the experiment was performed as follows:

Four flasks were taken; into the first were introduced a few grains of ammonium chlorate, the most alterable of the alkaline chlorates; into the second a mixture of the chlorate and sulphate of copper; into the third chlorate of copper; and into the fourth a mixture of the chlorate and a salt of vanadium. A piece of cloth, impregnated with aniline salt and an excess of alkali, was suspended in each flask. From the disposition adopted, the last three flasks contained the elements of aniline black, but there could be no reciprocal action between the bodies, as they were not in contact. The flasks being placed on the water-bath, in such a manner as to submerge only that part of the flask containing the chlorate; the temperature of the bath was then raised. The black was first developed in the flask containing the vanadium salt (at about 30° C). The temperature continuing to rise, the same thing followed in the flasks containing the copper salts, the flask containing the ammonium chlorate alone remaining inert.

From this experiment it was easy to conclude, and legitimately, too, that it was the *gaseous products*, emanating from the chlorates under the influence of the salts of copper and vanadium, which developed the black on the cloth.

As corollary to this experiment, aqueous solutions of chlorine, of hypochlorous acid, chlorous acid, and hypochloric acid were prepared and introduced into flasks into which were suspended pieces of cloth impregnated with an aniline salt, as in the first case. Under the influence of the chlorinated gases diffused in the atmosphere of the flasks, the action was very rapid; the black gradually developed, coloring the piece of cloth first green, which increased in intensity until it reached a blue-black; if the action is allowed to continue, the blue-black becomes violet, then red, and finally assumes that russet color peculiar to aniline black which has been subjected to the influence of hypochlorites, a well-known phenomenon which has been studied in detail by Camille Kœchlin (see *Moniteur Scientifique*, t vii p. 769). The experiment succeeded quite as well with silk and wool as with cotton.

Thus all the gaseous bodies produced by the deoxidation of chloric acid, from hypochloric acid to chlorine, transform aniline salts into black at the surrounding temperature, and without the intervention of a metal. The finest black is formed with chlorous and hypochloric acids. Chlorine yields a black which is rather too violet, its action being rather difficult to regulate.

The different phases of the development of aniline black, which are particularly easy to observe when the chlorinated gases are used, are significant enough in practice to deserve further notice. The green substance first formed, which becomes blue-black by the prolonged action of the gases producing it, experiences the same transformation, only more rapidly, by immersion for a few moments in aqueous solutions (not strong) of the above mentioned gases. Chromic acid and potassium bichromate possess the same property; it is well established that *acid* or *dehydrogenating* media transform this greenish black substance, often designated by the term *emeraldine*, into a blue-black, which is aniline black proper. On the other side this same emeraldine turns blue black by the action of the alkalies.

These two blacks, so liable to be confounded, as far as appearance is concerned, are evidently very different in their properties; for while the last becomes green under the slightest acid influence, the first, produced in an acid medium, resists the change. It requires concentrated acids or reducing agents similar to sulphurous acid to transform aniline black into emeraldine. Relative to aniline black proper, emeraldine is at a lower state of oxidation according to M. Zucher, which opinion seems to be confirmed by the above observation.

The simultaneous existence of two blacks, a mixture of which constituting aniline black of commerce, was observed, and these were described in 1872 by M. Brandt, in a work in which he showed the advantages derived from the substitution of aniline chlorate for potassium chlorate, generally employed until then.

One, which he regards as being formed by a chlorinated derivative of aniline, is very fast and resists almost all chemical agents; the other resulting from the oxidation of an aniline salt, is not so fast and turns green by the slightest acidity. M. Brandt thinks a mixture of the two is necessary to produce the proper shade.

To conclude then, aniline black is produced at the ordinary temperature every time an aniline salt is placed in a dehydrogenating medium, such as active oxygen, chlorine; the lower oxides of chlorine and the mixture employed for the production of aniline black, containing a chlorate and metallic salt, has for effect to produce the above alluded to bodies, which effect is due to the great instability of the chlorates of these metals. —*Bulletin de la Societe Industrielle de Mulhouse*, 1876.

DIGEST OF DECISIONS OF TREASURY DEPARTMENT (Customs) FOR YEAR 1876.

Continued.

Artificial Mineral Waters—The Department having received information that a large portion of the mineral waters imported in bottles, and which are entered free of duty as *natural*, consists in fact of artificial mineral waters, which are dutiable for each bottle or jug containing not more than one quart, 3 cents; and in addition 25 per cent ad valorem, appraiser is instructed to make careful examination of all importations, and also to require that all invoices of so-called natural water shall be accompanied by certificates from shippers abroad showing that they are in fact natural waters, and specifying these spring or springs, which produce the same.—Decisions 1876, No. 2973.

Damage accruing from carelessness of Custom employees.—This was a claim for damage to goods at the public store by reason of the careless re-packing after examination. Held that when the damage was the result of the carelessness and negligence of the opener and packer, the actual damage should be ascertained, and the employee required to pay the amount.—Decisions 1876, No. 2969.

Landing Certificates of Petroleum, Exported in Tin Cases.—With reference to the production of landing certificates, it is directed that a drawback is allowed only on the cans, and their value must be noted in the invoices, with a view to avoid the payment of larger fees than the regulations require.—Decisions, 1876, No 3021.

To be Continued.

PHENIX CHEMICAL WORKS.

The accident which befell one of the buildings of the Phenix Chemical Works, Brooklyn, in the gale of Friday morning has been very much exaggerated. In the first place the damage is confined to the upper portion of one building occupied by a set of oil of vitriol chambers, which at the time was being overhauled and not in use. In the second place no material or stock was injured, and the lumber and material of the portion blown down is mostly available for repairing the building which will be complete in a few days. The loss is comparatively small and will not interfere in the least with the business of the company, and Mr. Gridley informs us they are prepared to deliver goods as usual

CORRESPONDENCE.

Editor OIL PAINT DRUG REPORTER

CAMBRIDGEPORT, MASS.

Will you please inform me what "Meudoh Chalk" is and where it may be obtained, and oblige,

J. O. B.

By meudoh chalk is evidently intended *Blanc de Meudon*, a chalk deriving its name from some local association as the *Blanc* or chalk *de Troyes*, chalk found in France. As chalk is a carbonate of lime including in its composition varying proportions of silica alumina, magnesia and iron, possibly this meudon chalk is recommended for the *glaze* in question because of its containing certain proportions of the elements enumerated above. If not, probably any other chalk would be as good. If pure chalk or carbonate of lime is required you will know how and where to procure it. Meudon chalk as such is not known in our market.

BUSINESS CHANGES.

DRUGS.

Albany, N Y—George L Brown has given a mortgage for $161.

Buffalo—C M Lyman has done the same for $85.

William Pask keeps them company for $2000.

W H Peabody is selling out.

Lockport—H J Chadwick has been burnt out, but insurance company pay the loss.

Pike—C & D A Powell, have dissolved.

Westmoreland—E Beckwith has been partly burnt out, loss $1000 with a small insurance.

A F Seymour has been burnt out; $3500 insurance.

Meridan, Conn—H T Wilcox & Co. have sold out their hardware business.

New Haven, Conn—Alfred Daggett has sold out to E A Gessner.

Klock & Gessner dissolved. J H Klock continues.

Woodbury—William E Woodruff is dead.

Barnesville, Ga—P R Holt has left the business.

Chicago, Ills—Bassett & Klock have done the same.

Huntoon & Hall have given a mortgage for $1280.

H F Kroft has got a judgment against him for $2435.

Ottawa—M J Tozier has given a mortgage for $3600.

Padua—Alvin T Hinton has gone into bankruptcy.

Sublette—Thomas M Coleman has sold out to Wm R Long.

Woodland—Brown & Endicott have done the same to E Sabin.

Clinton, Ind—William Campbell has been sued.

La Porte—Hood & Co have dissolved.

William Bevier has been closed by the sheriff.

Masonville, Iowa.—E Oviatt, has sold out to W E Lawrence.

Boston, Mass.—William M Pratt has given a bill of sale for $520.

Springfield.—B F Quimby has sold out.

Blissfield, Mich.—Taylor & Orr have separated.

Flint.—C A Mason & Co have done the same.

Vernon.—Smith & Bird keep them company.

St Louis, Mo.—A A Mellier has had his stock damaged by water.

H H Vogt has given a mortgage for $556.

Lee, N H.—I D Edgerly has been burnt out.

Zanesville, Ohio.—W A Graham & Co have dissolved; new firm continue style of Graham, Bailey & Co.

McMinnville, Oregon.—W H Boyd has got an extension.

Brandon, Vt.—C Mott has sold out.

Almonte, Can—J H Neilson has done the same.

PAINTS.

Albany, N Y—Frederick J Lawrence has got a judgment against him for $175.

Buffalo—John C Post is offering to compromise.

Ternon, Conn—William D West has sold out to F W West.

Northampton, Mass—C H Brewster is offering to compromise his debts.

Morristown, N J—Allen & Cranston have changed style to Lawrence & Allen.

Phila, Pa—Burr Bros, have separated.

George W Mactague is dead.

Cornwall, Can—William Irons has made an assignment.

CONFECTIONERS.

Buffalo, N Y—Henry C Benson has got a few judgments against him for $196.

Chas Steck has given a mortgage for $33.

Davenport, Iowa—G & J F Bredon have given a mortgage for $36.

Lewiston, Me—John A Tracy has done the same for $250.

Clear Spring, Md—Daniel Mason has sold out to David Tice.

Bay City, Mich—A E Goodale has sold out.

Sancook, N H—F A Hutchins has been burnt out.

Owen Sound, Can—Anderson & McLaughlan have dissolved, and James McLaughlan is alone.

Prescott.—H A Bronse is offering to pay 30 cents cash.

SOAP.

Pittsfield, Mass.—Noble & Scace have dissolved, and Scace is alone.

GLASS.

Rochester, N Y.—Gatchell & Co have got a judgment against them for $725.

Boston, Mass.—R & W Sherburne have dissolved, and R Sherburne continues.

VARNISH.

Boston, Mass.—Moses C Lang is dead.

OILS.

Cleveland, Ohio.—G W P Atkinson, late of Gest & Atkinson has associated himself with the Meriam & Morgan Paraffine Co.

Drug, Chemical and Pharmaceutical Notes.

EDITED BY N. C. WHITE.

NEW FORMULÆ FOR PERFUMERY.

We publish the following from an elaborate article by Mr. W. Saunders, of London (Ontario), which was read at the last meeting of the Am. Pharmaceutical Association. He says:

For some time past the tendency has been to turn over the manufacture of perfumes too much to the specialist. This has probably resulted mainly from two causes,—first the difficulty of procuring the materials used in the making of perfumes in a state of purity, and in the second place for want of plain and practical information on the subject. The first obstacle is less felt now than formerly, and to aid in the removal of the second is the main object of the present paper. My purpose is to place within the reach of every one of our members such information as will enable him with a little attention, to equal the finest productions of a Lubin, an Atkinson, or a Rimmell.

Briefly referring to the ingredients he mentions them as follows:

Alcohol.—One of the first requisites in the manufacture of good perfumes is pure alcohol, free from fusel oil or other foreign flavor. This purer grade of spirit is known in commerce as pure spirits, silent spirits, or deodorized alcohol, and may readily be distinguished from ordinary alcohol by the absence of that peculiar pungency of odor which is present to a greater or less extent in most commercial samples.

Ottos or Essential Oils.—It is of the greatest importance that these should be strictly pure and of the finest quality.

Pomades.—From these are prepared some of the simple extracts in the appended formulas, such as jasmine, tuberose, and cassia. The quality must be that known as triple pomade. The simple extracts are prepared as follows: one pound of the pomade is cut in small pieces and placed in a bottle of sufficient capacity, in which is put a pint of pure spirit. Place the bottle suitably stoppered in a water-bath, and apply heat sufficent to barely melt the pomade, shake well together, and repeat the shaking frequently until the matter solidifies. In this way the pomade will be reduced to a finely divided or granular state, permeated thoroughly by the spirit. Allow this to stand for several days, giving it an occasional shake, then drain off the liquid extract into another bottle; if this falls short of a pint repeat the operation with a sufficient quantity of alcohol to make up to this measure. By subsequent and similar treatment, a second and even a third quantity of extract may be made, which although much weaker, will be found useful in the preparation of cheaper perfumes.

Extract of Orris.—Seven pounds of finely ground orris root of good quality, is treated by percolation with pure alcohol until one gallon of extract is obtained.

Extract Vanilla.—Four ounces of vanilla beans of the finest quality, powdered finely in a mortar with a sufficient quantity of dry white sugar (from four to six ounces), pack in a percolator, and percolate with proof spirit until one gallon is obtained.

Extract Tonka.—Take one pound of tonka beans, reduce to a coarse powder, and percolate with alcohol, to make one gallon.

Extract Musk.—Take of pure grain musk of the first quality two drachms. Mix half an ounce of liquor potassæ with four ounces of proof spirit, and triturate the musk with this mixture until it is thoroughly softened, and reduced to a creamy state; add enough proof spirit to make up about one pint; stir well, then allow the coarser particles to subside, and pour off the supernatant fluid. Rub the coarser portions again with a fresh portion of spirit, proceeding as before, and repeat the process until the musk is entirely reduced, and the quantity of extract measures three pints. Allow this to stand for a fortnight with occasional shaking, when it will be ready for use.

Extract Styrax.—Eight drachms of styrax balsam dissolved in one pint of alcohol.

Benzoic Acid.—Only that prepared from gum benzoin should be used.

FORMULAS.

Moss Rose.

Otto Rose, Virgin....	2	drachms.
" Santal Flav.....	2	"
Ext. Musk.....	12	ounces.
" Vanilla.....	4	"
" Orris.....	2	"
" Jasmin.....	4	"
Benzoic Acid.....	1	drachm.

Pure Spirit, sufficient to make four pints.

Musk.

Ext. Musk.....	1	pint.
" Orris.....	6	ounces.
" Vanilla.....	2	"
" Styrax.....	2	drachms.
Otto Santal Flav.....	1	drachm.
" Bergamot.....	2	drachms.
" Neroli Super.....	10	minims.
" Patchouly.....	12	"
" Lavender. English	15	"
" Cinnamon. true..	6	"

Pure Spirit, sufficient to make four pints.

Ess. Bouquet.

Ext. Musk.....	4	ounces.
" Tuberose.....	2	"
Otto Rose, Virgin.....	4	drachm.
" Bergamot.....	1½	"
" Neroli Super.....	½	"
" Verbena *true*....	8	minims
" Pimento.....	10	"
" Patchouly.....	3	"

" Lavender, English	12	minims.

Pure Spirit, sufficient to make four pints.

Victoria.

Otto Rose, Virgin.....	2	drachms.
" Neroli Super.....	2	"
" Bergamot.....	4	"
" Coriander.....	16	minims.
" Pimento.....	24	"
" Lavender, English	16	"
Ext. Jasmin.....	2	ounces.
" Orris.....	16	"
" Musk.....	2	"
Benzoic Acid.....	2	drachms.

Pure Spirit, sufficient to make four pints.

Jockey Club.

Ext. Jasmin.....	5	ounces.
" Orris.....	20	"
" Musk.....	7	"
" Vanilla.....	1½	"
Otto Rose, Virgin.	1½	drachms.
" Santal Flav..	1½	"
" Bergamot....	2½	"
" Neroli Super.	40	minims.
Benzoic Acid.....	2	drachms.

Pure Spirit, sufficient to make four pints.

White Rose.

Otto Rose, Virgin.....	2	drachms.
" Red Cedar Wood, *true*.....	6	minims.
" Patchouly.....	4	"
" Orange, *fresh*.....	½	drachm.
Ext. Tuberose.....	2	ounces.
" Orris.....	2	"
" Jasmin.....	2	"
" Musk.....	2	"
Benzoic Acid.....	1	drachm.

Pure Spirit (to which four ounces of rose-water has been added), sufficient to make four pints.

DR. BROWN-SEQUARD ON NERVE DISEASE.

The recent lectures of Dr. Brown-Sequard show him quite apart from the prevailing physiologies. He teaches that symptoms of paralysis, anæsthesia, amaurosis, aphasia, etc., are due to irritation, and not cessation in the function of various parts of the brain; for irritation of parts around the portion destroyed by disease causes certain sensations; not that the part destroyed causes them, but because an irritation starting from the place around influences cells, some near, some at a considerable distance from the locality of the lesion. Dr. Brown-Sequard, therefore, believes that certain functions of the brain, instead of being localized in clusters of cells, are, on the contrary, spread over the greater (if not the entire) part of the brain; and this theory explains a very large number of cases of disease which otherwise it would be impossible to understand. Parts in the brain supposed to be endowed with special functions can be destroyed without any alterations in the loss of functions, and *vice versa*; so that it follows that any part of the brain can produce anæsthesia, aphasia, paralysis, or amaurosis, and parts supposed to contain special functions can be destroyed without causing aphasia, amaurosis, etc. As regarded treatment in cerebral affections, Dr. Brown-Sequard places most reliance on the actual cautery brought to a white heat, and scored along the back of the neck, opposite the last cervical and first dorsal vertebræ. Strychnia also, pushed so as to produce spasmodic movements, is of considerable service, but perfectly useless in smaller doses.—*Med. and Surg. Reporter.*

TREATMENT OF DIARRHŒA IN HOT CLIMATES BY SUGAR OF MILK.

Dr. Talmy prescribes for the diarrhœa in hot countries from 20 to 300 grammes of sugar of milk daily. He administers it in the simplest way: the sugar, dissolved in a little water or as a syrup, may be partly taken at each meal, or as a draught in the course of the day. An excellent mode of administration consists in putting the dose of sugar of milk to be taken, into half a litre or two litres of milk, according to the habits and the digestive capacities of the patients. The treatment is spread over several months, diminishing the dose as nutrition becomes more considerable and easier. According to M. Talmy's little work (published by Coccoz, Paris), the endemic diarrhœa of hot climates is the result of a functional lesion of the liver, which results in the deminution and even the suppression of the glycogenic function of the liver. The sugar of milk may thus replace the glucose which is wanting in the blood.

NEW SIZE.

Hai-thao, or galuse, is a tasteless, odorless, colorless mass, obtained from a fibrous seaweed common on the coast of China and Mauritius. It is insoluble in cold water, but dissolves in hot water after boiling for ten minutes, and then forms a thin, dirty white solution, which, on cooling, deposits a yellowish-gray jelly. The material has lately been used on the continent for finishing cotton fabrics, and is reported to fill the thread more perfectly than dextrine or starch. By adding glycerine to the hai-thao solution, a still softer and at the same time stronger material is obtained. According to experiments made by Heilmann, an abstract of which is given in Dingler's *Polytechnisches Journal*, it appears that the material can only be employed for fine textures, soft and firm to the touch, and cannot be used as a substitute for dextrine or potato starch where a strong material is required.

CARBOLATED CAMPHOR.

M. Soulez in the *Bulletin de Therap.*, gives the following formula for carbolated camphor and an account of its composition: Dissolve 2 5 grammes of powdered camphor in one gramme of a solution of carbolic acid (of the strength of nine grammes in six grammes of alcohol). The solution is of oleaginous consistency, pale yellow, smelling slightly of camphor, but having none of the disagreeable odor of carbolic acid. It boils at a slightly elevated temperature without decomposing, but appears to be decomposed by strong alcohol, which throws down the camphor in crystals. If a boiling solution of carbolated camphor be thrown into cold water, it instantly solidifies. It is miscible in all proportions with olive and almond oils. Chemical examination shows that the carbolic acid and camphor are not altered, and that they preserve their properties in the combination.

REMEDIAL AGENTS.

Sickness being a tiresome, monotonous, dreary system of endurance, it is not strange that chronic patients demand from time to time some medicinal plaything which shall give the combined charm of novelty and renewed hope. This accounts, suggests the *Daily Graphic*, for the successive eras of water cure, friction, Swedish movement, quassia wood drinking cups, steam baths, galvanism, grape cure, milk cure, sun cure, cundurango, warm blood baths, extreme vegetarianism, will cure, and finally blue glass. All of these have doubtless some specific remedial quality, and all in time will probably contribute their quota to the grand coming system of eclecticism.

BICARBONATE OF IRON.

We have lately received from correspondents in Arkansas samples so saturated with bicarbonate of iron as to completely obstruct, by precipitation, the pipes and valves of steam engines in which an attempt has been made to use the water. We are in possession of specimens of this deposited carbonate fully an inch in thickness, and remarkably free from foreign salts. It might find employment in the production of medicinal preparations and ferruginous salts used in the arts.

TYRIAN PURPLE INK FOR MARKING LINEN.

Von Bele gives the following method for preparing an ink for marking linen and cotton; neutralize 75 grains of carbonate of ammonia with pure nitric acid, and triturate 45 to 60 grains of carmine with the solution Mordant the fabric with a mixed solution of acetate of alumina and tin salt, and write upon it, when it is perfectly dry, with the ink.

VASELINE CAMPHOR ICE.

J. C. B.—In answer to your query we publish the following formula, furnished by Mr. R. A. Cheesbrough:

Pure Vaseline,.....	43	per cent.
White Wax,.....	43	"
Gum Camphor,.....	14	"

Melt vaseline and wax together, then add camphor, and keep stirring until all dissolved. Use a steam jacket, for heating.

A prize of 4,000 livres ($400) is offered by the authorities of Reggio, in Southern Italy, for the best apparatus for extracting the essential oil of bergamot, the condition being strength and cheapness in the apparatus itself, combined with capacity for producing the largest quantity of essence in the shortest time, without detriment to the color, purity, and fragrance of the product.

The following is a formula for preparing Essence of Lemon:

Oil of lemon.....	1 fld. oz.
Alcohol.....	19 fld. ozs.

Mix, and agitate well together. A few small pieces of lemon peel added, and allowed to digest for a few days, improves it.

Importations, 1877.

The following is a complete list of the imports of Oils, Paints and Drugs entered at the ports of New York and Boston for the present year up to date (in cases where weight cannot be correctly stated the number of packages alone will be given.)

Exports of Drugs, Oils, Paints, Chemicals and Dyestuffs for the past week.

ACID.
200 carboys, per Miranda, for Havana.
10 carboys, per J M Merrill, for Cienfuegos.

ASPHALTUM.
40 hhds, per Christel, for Bremen.

BARK.
20 bales, per Hammonia, for Hamburg.

BRIMSTONE.
125 bbls, per Hammonia, for Hamburg.

COAL TAR PITCH.
325 tons, per Heloise, for Genoa.
575 tons, per Maud Scammell, for Genoa.

COTTONSEED.
181 bags, per Ethiopia, for Glasgow.

FISH OIL.
200 bbls, per Johan Wilhelm, for Havre.

FLAVINE.
2 bxs, per America, for Bremen.

FOOTS.
15 bbls, per Abyssinia, for Liverpool.

FUSTIC.
180 tons, per Adele Accame, for Liverpool.

LARD OIL.
145 bbls, per State of Indiana, for Glasgow.
89 bbls, per Ethiopia, for Glasgow.
2 bbls, per City of Mexico, for Vera Cruz.

LINSEED OIL.
4 bbls, per W S Farwell, for Puerto Cabello.

LOGWOOD.
20 tons, per Maud Scammell, for Genoa.

LOGWOOD EXTRACT.
400 cs, per Maud Scammell, for Genoa.
2000 cs, per Hammonia, for Hamburg.

OIL CAKE.
984 bags, per Abyssinia, for Liverpool.
542 bags, per Alexandria, for Glasgow.
552 bags, per State of Indiana, for Glasgow.
1142 bags, per Ethiopia, for Glasgow.

OIL MEAL.
25 hhds, per Rising Sun, for Bridgetown.
80 pkgs, per Wm Dening, for St Kitts.
90 pkgs, per Wm Thompson, for St Kitts.

OIL PALM.
1 ck, per W S Farwell, for Puerto Cabello.

OIL PEPPERMINT.
3 cs, per America, for Bremen.

PAINT.
56 kegs, per W A Van Brunt, for Vera Cruz.
30 pkgs per City of Mexico, for Vera Cruz
2 pkgs, per Flamborough, for St Johns.
7 pkgs, per Columbus, for Havana.
3 pkgs, per J L Merrill, for Cienfuegos.
2 pkgs, per J E Mor, for Sagua la Grande
11 pkgs, per W S Farwell, for Puerto Cabello.

PETROLEUM.
30 cs, per Wm Thompson, for St Kitts.
200 cs, per W A Van Brunt, for Vera Cruz.
1235 pkgs, per City of Mexico, for Vera Cruz.
316 pkgs, per Curacao, for Curacao.
10 bbls, per Cygnus, for Halifax.
250 cs, per Antelope, for Georgetown.
20 cs, per E A De Hart, for Aux Cayes.
19800 cs, per Windward, for Batavia.
2000 cs, per Stella Maris, for Brisbane.
100 cs, per A W Barker, for Arroyo.
2200 bbls, per Carpari, for Cork.
7803 bbls, per Helvetia, for Antwerp.
20 cs, per Francis, for St Johns.
75 cs, per L H Cole, for Matanzas.
1000 cs, per Jose Gomez, for Rio Grande.
139 pkgs, per Emily, for Belize.
2100 bbls, per Martin Luther, for Cette.
2620 bbls, per Palmetralt for Elsinore.
2467 bbls, per Lagaboter, for Belfast.
2415 bbls, per Richard, for Danzig.
3260 bbls, per M Scammell, for Genoa.
137 pkgs, per Lizzie Titus, for Ciudad Bolivar.
10108 pkgs, per G Rocco, for Beyrouth.
13200 cs, per Macchivelle, for Alexandria.
4225 bbls, per Ceder, for Hamburg.
500 cs, per Rising Sun, for Bridgetown.

PITCH.
10 bbls, per S H Coles, for Matanzas.

QUICKSILVER.
4 flasks, per Lizzie Titus, for Ciudad Bolivar.

RED.
2 kegs, per Lizzie Titus, for Ciudad Bolivar.

RED OIL.
50 bbls, per City of Mexico, for Vera Cruz.

ROSIN.
100 bbls, per Sierra Nevada, for Sydney.
50 bbls, per J L Merrill, for Cienfuegos.
26 bbls, per Columbus, for Havana.
200 bbls, per Anita Owens, for Montevideo.
642 bbls, per Maud Scammell, for Genoa.
200 bbls, per Jose Gomez, for Rio Grande.
617 bbls, per Christel, for Bremen.
790 bbls, per Spain, for Liverpool.
20 bbls, per Stella Maris, for Brisbane.
250 bbls, per Ethiopia, for Glasgow.

320 bbls, per America, for Bremen.

SENEGA ROOT.
4 bales, per Hammonia, for Hamburg.

SODA CAUSTIC.
10 dms, per J L Merrill, for Cienfuegos.

SPERM OIL.
3 bbls, per Ethiopia, for Glasgow.
383 cks, per Ne Plus Ultra, for London.

TURPENTINE.
150 bbls, per Sierra Nevada, for Sydney
1 bbl, per J L Merrill, for Cienfuegos.
500 cs, per Maud Scammell, for Genoa.
50 cs, per Jose Gomez, for Rio Grande.
200 cs, per Stella Maris, for Brisbane.
12 cs, per City of Mexico, for Vera Cruz.

VARNISH.
1 bbl, 144 lbs, $15, per W S Farwell, for Puerto Cabello.
1 pkg, 25 gls, $31, per J L Merrill, for Cienfuegos.
22 cs, 1474 lbs, $204, per Columbus, for Havana.
1 cs, 2 gls, $10, per Francis, for St Johns.
9 pkgs, 82 gls, $94, per City of Mexico, for Vera Cruz.
60 cs, 600 gls, $750, per Angvold, for Buenos Ayres.

WHITE LEAD.
5 pkgs, per W E Farwell, for Puerto Cabello.
20 pkgs, per W A Van Brunt, for Vera Cruz.

ZINC OXIDE.
100 bbls, per Celtic, for Liverpool.

LONDON MARKET REPORT.

London, Feb. 10, '77.

DYESTUFFS.

Cochineal has become very in consequence of free arrivals which have amounted to over 1300 bags during the fortnight, including one or two small parcels from New York. Holders however are very firm and withdrew quite freely at the public sales this week, only about 100 bags finding buyers at previous rates; the remainder, about 650 bags, being held for very full ones. Teneriffe silver 2s 10d to 2s 11d, black, 3s 1d to 3s 3d; gray do, 3s 3d . Honduras s ver 2s 10d to 2s 11d and black 2s 10d to 3s. Mexican, silver 2s 9d and black 3s. Deliveries are still light.

Argols: 70 bags Cape partly sold at 87s to 87s 6d for gray and white rather dusty; cream of tartar is very dull with sellers at 106s, but little enquiry; for shipment the price is 103s f o b Marseilles; cutch is quiet and the demand limited to retail transactions and the quotation is almost nominal at 25s 6d to 26s 6d; gambier is also quiet and lower prices have been accepted. On the spot small sales of whole bales have been made at 22s 3d to 22s 7½d with sellers for distant arrival at 22s to 22s 3d. Galls: Tu blue, very little demand, with sellers of good blue at 90s, but less would be accepted. China have also receded and find a slow sale at 58s to 59s. Orchella weed is steady with a good consumptive demand for Californian, holders of which are firm at 32s to 36s. Zanzibar Brava 35s to 40s, fine wiry leaf 70s to 75s. uayaquil at 45s to 46s. Safflower is quieter again, ll sales made of of ordinary loose at £3 10s, middling to good ditto at £4 10 to £5 up to £5 10s to £5 15s for good small cake. Turrmeric has been in improved request, and 22s 6d to 23s has been paid for Bengal, with little obtainable now under 24s; fine bright bold finger Madras sold at 27s 6d to 28s. Cochin split bulbs 15s to 17s for dull to good bright.

GEORGE SOANES, SON & CO.'S MARKET REPORT.

THURSDAY, Feb. 22,'77.

Linseed.—We have had considerable further arrivals during the week from Calcutta, amounting to 21,699 quarters, almost the whole in second hands The market however, in spite of this import, has not given way; early in the week 50s was accepted for a little Calcutta ex ship, but resales have since been rather freely made at 50s 3d, and 50s 6d is now demanded. For arrival business is reported in January and February bill of lading at 51s@51s 6d, and at 52s 6d@52s for April to June shipment via the Cape. The cargo of Turkish seed at the coast has been taken on c f and i terms to the Continent at equal to about 51s 3d U K terms, and a parcel of similar description in warehouse here has made 51s.

Rapeseed.—There has been a little more enquiry for yellow mixed seed; fine bold Calcutta on the spot has been sold at 62c, and small grain at 60s@59s 6d; for Guzerat on the spot 64s 6d is wanted, and 62s for March to to May shipments. Good brown Calcutta on the spot we quote 57s 6d, middling 56s 6d; Ferozepore 56s; Soumeanee 58s 6d. Calcutta for present shipment has made 50s cost and freight, and March to May shipments of the new crop by steamer offer at 51s 6d, with buyers at 51s. A steamer of wild rapeseed for present shipment at Odessa has been taken for U K at 29s 20 per cent basis. Poppy seed is unaltered, 51s@51s 3d January to February bill of lading. Persian sessame seed now shipping has found buyers at 63s.

Cottonseed arrived by steamer in London has been sold at £8 3s 9d, and £8 2s 6d has been accepted for good samples at Hull. For seed on passage by steamer to London £8 3s 9d has been paid, and three coast cargoes have been taken, two at £8 6s 3d, and a larger one at £8 5s; February shipments to Hull offer at £8 5s, and March at £8 7s 6d.

The demand for linseed cakes is still very moderate, but cottonseed cakes fell pretty freely. Linseed Cakes—London made per ton £10 10s@£11; American oblong New York in bbls do £11; do do Western in bags do £9 10s@£9 12s 6d; New York & Boston in bags (E I Seed) do £9 14s@£10 12s 6d; Marseilles square do £9 10s. Cotton Cakes—English per ton £51 7s 6d@£6; do decorticated American do £7 15s.

Linseed oil continues quiet at £25 10s spot, £25 15s March to April, and £24 5s May to August. Hull delivery £25 2s 6d@£25 5s spot and month, £25 10s March to April, and £25 15@£26 May to August.

Rape and other Seed Oils—Although some speculative sellers having been offering for forward delivery at low prices, there is very little oil obtainable either for spot or next two months spot £37 15s, March to April £37 10s@£37 15s, May to August £36 15s@£37, September to December £35 15s@&£36. English refined £39 15s. Foreign refined £40. Crude cotton oil flat, £25 15s@£26; Refined £29 10s@£30 spot and March to April. Hull delivery £28 15s spot, and £28 17s 6d March to April Niger oil £35.

Olive oils dull.

Palm oil £39 10s best Lagos.

Cocoanut oil although quiet is in better enqiry. Ceylon £37@£37 5s. Cochin £41@£41 10s.

Fish Oils.—Sperm £88@£89; Cod £40; Pale Seal £34 10s.

Turpentine, &c. — Spirits lower; American 28s@28s 3d spot and March to April, and 27s 6d May to August. Petroleum 1s 1¼d spot, 1s 1d March to April, and 1s 2½d September to ecember.

DRUG MARKET.

NEW YORK, Tuesday Ev'g, Mar. 13.

The demand for drugs still continues, and the indications are that the business will be fully up to expectations of dealers. There is more disposition shown to buy goods, and the parcels being taken are becoming larger. Prices for most descriptions are ruling quite steady, and there are but few changes to make in our review below. Importations continue fair, but are taken as they come to hand, and have no effect on the market.

Opium is still quiet in a large way and no demand is to be noted. Prices are nominal and quoted at previous figures, but less would buy. The demand for small parcels is improving and we hear of sales of 5 cs in lots at $6 15, though some holders are quoting a higher figure, and for small jobbing parcels an advance would have to be paid. Powdered is quiet and unchanged.

Morphine is selling in small parcels as wanted and manufacturers are asking $4 60.

Quinine has been in better request owing to advancing prices and some sales have been made of lots, and manufacturers are now holding at $3 25. The advance is due to the high price of bark.

Quicksilver has been quiet, and the demand only of a jobbing description. There have been no large sales that we hear of, and prices are quoted as before. A parcel to hand from Europe has gone to a consumer. We hear that the price in London had declined to £7 5s, which would make the price here about 46c, and that several parcels are on the way.

Camphor is selling steadily, and at an easier figure holders now accepting 32c and 10 bbls are reported sold at this figure, though a higher price is demanded.

Borax is selling fairly at easier figures and 10 bbl lots of city are now being taken at 10c.

Alcohol is a shade easier in price, and can now be had at $2 08 in a small way; a large parcel could be had at a lower figure.

Aloes have sold fairly, and rule easy in price at 13c, with sales of 10 cases at this figure.

Arnica flowers are off a shade and with only a trifling demand, holders are willing sellers at 12½@13c.

Balsam copaiba is quiet and there have been no sales that we heard of in a large way. Jobbing parcels are being taken at 42c.

Balsam tolu is quoted at $2 15@2 25c as to quantity, but these figures are nominal as there is no demand at the moment.

Barks are steady in price and some descriptions are scarce in stock and show an upward tendency. Sassafras is selling fairly and is easier at 6@6½c with sales of 7000 lbs. The demand for other descriptions is quiet at the moment.

Iodide potass is firmer again, dealers now quoting $3 50.

Licorice paste still meets with a good demand, and rules steady in price. Stick is also moving, and parcels are being taken quite freely. Prices are well maintained, and some are higher. Large stick Guzolina is now held at 35c, with sales of case lots.

Cardamons are selling fairly for jobbing wants, and case lots are being taken at $1 25@1 45. Prime Malabar is held at $1 45 in case lots.

Cuttlefish are ruling steady in price, with sales of 2 strap lots at 29c. A round parcel could probably be had less.

Ipecac is rather quiet at the moment, but holders are firm as to price, and still quote $1 40 gold, but this is above buyers' views, and there have been no sales. Powdered is doing better, and with fair sales making, prices are steady at $1 50.

Shellac has been in rather better request, and some parcels have been disposed of, but we did not learn particulars. Holders are steady as to price, and now quote 34c D C, 30c V S O; small 5 case parcels of native are selling at 24c gold.

Cassia buds are selling quite freely, and the stock is becoming small; we hear of sales of 30 cases in lots mostly at 39c, and this figure will buy further lots at the close.

Canary seed are ruling rather quiet and prices are becoming weaker. Small parcels of Dutch are being taken at $2 25@2 37½ for prime, but we hear that one holder offers at $2 10 without finding buyers. Smyrna is dull and nominal the price being beyond the ideas of buyers.

Hempseed sells only in a small way as wanted at $1 50; Russian is selling in 10 bag lots at $1 60.

German rape seed sells slowly in 10 bale lots at $3 25, the trade not being active at the moment.

American saffron is moving to a moderate extent and we note sales of 5 bbls at 20c.

Thyme leaves have sold fairly and we hear of 1000 lb parcels being taken at 8c.

Castle soap is in good jobbing demand and prices are ruling steady in tone holders asking 8½c for mottled, and 15½c for white with sales of 50 bx lots at these figures.

Summer savory is selling in 500 lbs lots at 7½c.

Gentian root is rather easier and holders are now offering parcels at 5¾c with 6c asked in a small way.

Sweet marjorem is more enquired for and we hear of sales of 500 lbs at 11c.

Honduras sarsaparilla is in moderate demand and we only hear of sales of 5 bales at 27c.

Assafœtida is lower again and is now offering at 15c.

ESSENTIAL OILS have been in only moderate request, and prices are about as last.

Bergamot is selling in a small way, and holders still quote $3 90@4 00 gold.

Lemon is still coming to hand, but a rather better demand is to be noted, which is taking some of the lots. Prices are unchanged, holders asking $2 80@3 00 gold as to brand.

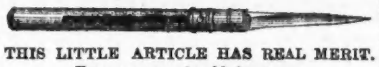
Peppermint is rather quiet and easier in price for pure oil which can now be had at $2 60. Case oil is quiet and unchanged.

Sassafras is held at 8c with a fair sale.

Wintergreen is lower again and can now be had at $2 60 in a small way.

Powdered Ext. of Licorice,
Licorice Lozenges,
5 and 10 lb. boxes.
M. & R. Extract of Licorice,
6 to 16 sticks to a pound.
For sale by CHAS. H. RUTHERFORD,
No. 9 Gold street, New York

THE GEM TOOTH-PICK.
A handsome nickel plated case with quill pick.



THIS LITTLE ARTICLE HAS REAL MERIT.
